

Mobility

Action Step

Convene a Task Force to discuss mobility (which was defined in the workshops as “getting around the neighborhood and getting into and out of the neighborhood”). This group will be responsible for clarifying the main transportation issues/questions and determining specific opportunities in this regard.

This is a short-term action step.

Immediate opportunity

1) Follow Transportation Alternative’s idea for organizing a meeting with the participants of IF2030, to engage members of Community Board 14 transportation committee into the conversation. 2) This group can take on the creation of a list of mobility concerns and present them to city/state agencies, such as the Department of City Planning, or any other relevant agencies. This presentation can be framed as a question to examine how well the type of development these agencies plan for the neighborhood responds to the community’s mobility concerns.

Ways to measure progress toward this goal

Extent to which the mobility committee is created, and the relevant concerns/questions are presented to the transportation committee of Community Board 14; the Department of City Planning; and any other relevant agency.
